PDF OPTIMIZED **FOR IPAD**

GENERAL INFORMATION

The smartly designed components are compatible with the Coulisse roller blind range enabling an existing roller blind to easily be converted into a double roller blind. The Coulisse range offers five different configurations for double roller blinds. The bracket system is available in 28 mm and 42 mm. The attractively shaped profile is compactly attached to wall or ceiling. The brackets are installed around the profile making it hardly visible after installation of the blind. Furthermore a semi-open as well as a closed cassette are available in which the role is nicely hidden. A unique feature in this range is the high design of the bottom rail which perfectly completes the blind and makes sure no light shines through between fabric and bottom rail. For a luxurious look a designer rail with bottom rail to match is available.

ADVANTAGES

- Five configuration options
- Unique technical features for optimal end result
- Tube aligner for easy alignment of the blind
- Extra wide bottom rail
- Tube sizes 25, 28, 30, 35, 42, 50 mm
- Compatible with Coulisse Absolute roller blind range
- Easy assembly and installation
- Designer rail with bottom rail to match available

THE 5 OPTIONS FOR DOUBLE ROLLER

1 Bracket system 25mm

2 Bracket system 42mm

3 Semi-open cassette

4 Cassette

5 Ultimate

TUBE ALIGNER

During installation of the blind deviations can occur due to several reasons. The installer may have to deal with crookedness of walls and/or ceilings or may not install entirely level. Furthermore slight inaccuracies in the fabric itself or in the processing of the fabric cannot always be avoided. Coulisse developed a unique new feature that allows deviations to easily be corrected after installation of the blind on wall or ceiling. The Coulisse tube aligner is incorporated in the bearing pin and allows for a vertical alignment of the blind with a simple turn of a hex key. This way the installer can easily correct deviations without having to disassemble the blind.

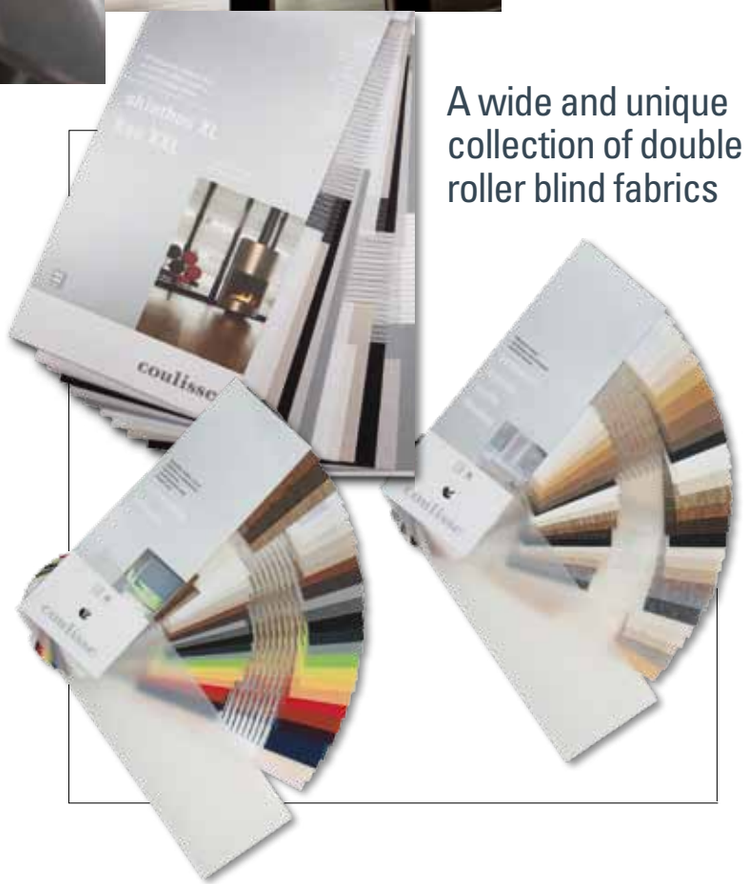
CREATE PRIVACY AND THE DESIRED LIGHT WITH DOUBLE ROLLER BLIND

Coulisse offers a wide range of double roller blind fabrics. Apart from perfect functional qualities the unique fabrics in the collections Coulisse developed offer amazing new variants as well as a broad spectrum of colours. With these novelties in the field of window decoration an exceptional, decorative accent in today's home interior can be created.

Transparent collections Santorini, Rhodos and Cyprus offer elegant linen varieties, while Corfu presents a range of delicate natural tones. The fashionable colours in collection Zakynthos allow for an expressive and daring look. Athens combines transparent stripes with black-out ones and has a natural look. The oversized stripes of the fabrics in innovative collections Skiathos XL (stripe width: 25 cm) and Kos XXL (stripe width: 40 cm) enable a good view outside and create a grand decorative effect, especially in front of large windows. All fabrics are suitable for the application in blinds up to 220 cm.

RECOMMENDATION

For the assembly of this still fairly new product in the market knowledge of and experience with the processing of window decoration fabrics is highly recommended. For a good result it is important that the stripes of the fabric are parallel to one another. Any deviation within customary industry tolerances can be corrected when processing the fabric for assembly. For detailed technical information we refer you to the technical specifications of the fabric itself.



A wide and unique collection of double roller blind fabrics

COMPANY PROFILE

Window decorations are more than just products: they are an expression of style and individuality. This has been Coulisse's vision since its establishment in 1992, and it has helped to make the business a leading supplier of both ready-made window-decoration products for DIY retailers and components for assemblers and wholesalers of made-to-measure products. Coulisse offers its clients a comprehensive range of products, from wooden Venetian blinds to roller blinds and from vertical blinds to pleated blinds. Thanks to a constant focus on innovation, creativity and flexibility, Coulisse is even capable of starting new trends and anticipating specific client needs. Coulisse products are developed in Enter and manufactured throughout the world.
