

CONSERVATORY BLINDS

VIDRIO plus

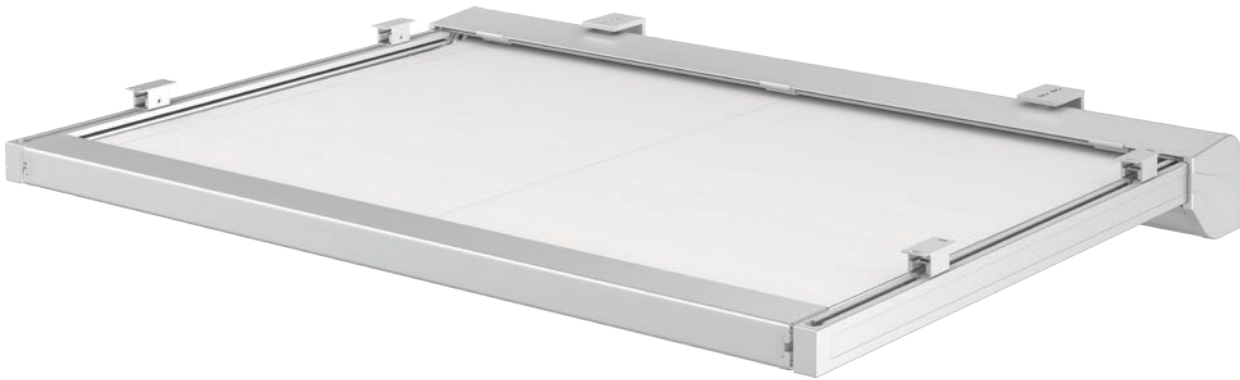

Vidrio plus – underglass awning especially for shading terrace roofings.

A perfect sun and glare protection under a glass roof.

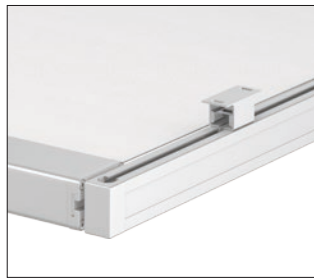

PROTECTIVE SUB ROOF

The underglass awning Vidrio plus with sophisticated crosshead die and perfect tensioning system. The guide and deflection rollers are optimized for an especially quiet operation. The perfect tensioning system ensures an optimized rolling up of the cover, due to two independently working torsion spring mechanisms.

- Protected against dirt and of low noise
- Up to a width of six metres
- Up to four and a half metres sloping projection
- Elegant ends
- Guide rails and front rail are perfectly matched
- Optimized guide rail clearance with in-line installation

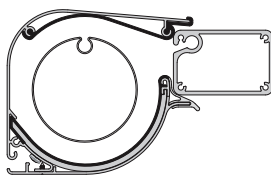

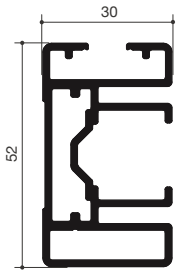

Detailed view

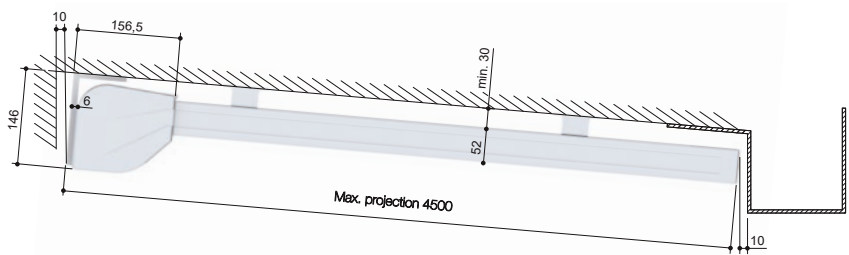

Perfect coordination of guide rails and front rail

Discreet and nicely shaped even in the retracted condition

End cap of the box in the retracted condition
