

# FACADE BLINDS

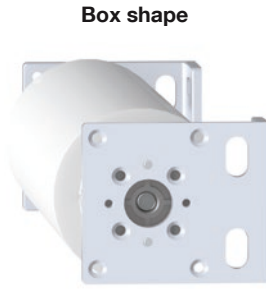

## VERTICAL AWNING

HELLA vertical awning – perfect heat and anti glare protection due to reflection of the radiated heat in front of the facade. The awning is especially suitable for monitor screen workstations and it also masters the shading of large surfaces at sports facilities or public buildings.

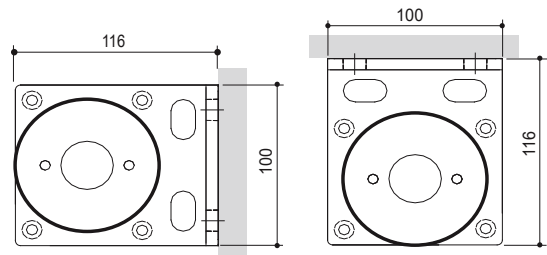

# VERTICAL AWNING

## FROM TOP TO BOTTOM

The awning is especially suitable for monitor screen workstations and it also masters the shading of large surfaces at sports facilities or public buildings.

**Vertical Awning SM**

According to the requirements, the brackets can be installed towards the rear or towards the top.
