SINTESI S2
THE INNOVATIVE PERGOLA

SINTESI S2

THE INNOVATIVE PERGOLA

Maximum elegance. The roof profiles slide, spaced along the side guides, therefore eliminating the unattractive "hung profile" effect, typical of other models. The aesthetic advantages go with the practical: **The overall size of the packed roof has been reduced by 20% in height**, compared to other competing products. It is the only product having its engine contained in a shutter box, under which elegant lights can be applied. Standard **obscuring and waterproof PVC. Resistant to winds up to 100 km/h***.

Rain drainage with a minimum slope of 6° (11%)*. Structure made of aluminum and steel. Possibility of combining multiple sections, even in the two slopes arrangement. Available for wall or ceiling mounting, or self-supporting.

Available in the two versions **SINTESI FREE** (version to be used for existing structures, or between walls) and **SINTESI ARCHI**.

**depending on sizes.*

- **Patented system for side guides width movement.**
- **Patented dripless system.**
- Maximum available size for single module
W. 6.000 x S. 5.110 mm or W.5.500 x S. 7.000 mm
- **Coating available in 20 standard colors.**
- Accessories on request: **Spotlights underneath the engine shutter box, led lights integrated in profiles, spotlights for pillars, profile color matching cloth color.**
- Roll-up awnings **Closer 115** with retained fabric within the side guides, thanks to a system of rods.
